## Summary

Software Engineer and Android Developer with 3+ years of hands-on experience building secure, scalable, and high-performance mobile applications in **Kotlin, Java, and Flutter**. Skilled in **Jetpack Compose**, MVVM/MVP, and Clean Architecture, with strong experience in REST API integration, third-party SDKs, offline storage, and secure authentication (biometric login, encrypted token handling). Published apps on the **Google Play Store** with 10,000+ users. experienced in Agile, cross-functional teams.

## Experience

**Software Engineer (Android)** — Codify (Hybrid) Jan 2026 – Present

- Design, develop, and maintain high-performance **Android and cross-platform mobile applications** using **Kotlin, Java, and Flutter**.
- Collaborate with product managers, UI/UX designers, and backend developers in an **Agile/Scrum** environment; integrate **RESTful APIs**, JSON, and third-party SDKs.
- Optimize applications for speed, performance, scalability, and security following Android best practices; resolve production issues through debugging and code reviews.

**Android Developer** — Mudhamatan (Remote) Jan 2024 – Jan 2026

- Developed and maintained production Android apps using **Kotlin and Java** with Jetpack Compose, XML, and MVVM.
- Integrated REST APIs and third-party SDKs, improving app performance, stability, and code quality.
- Published and maintained applications on the **Google Play Store** following Android and Play Console guidelines.

**LLM Trainer (Kotlin & Java)** — Turing (Remote) Oct 2025 – Jan 2026

- Evaluated LLM outputs for Kotlin, Java, and Android code, reviewing logic correctness and code quality.

**LLM Contributor (Kotlin & Java)** — Scale AI (Remote) Oct 2024 – Oct 2025

- Evaluated programming-related LLM tasks focused on Kotlin and Java.

**Android Instructor** — Freelance Sep 2023 – Mar 2024

- Delivered one-on-one training in Kotlin, OOP, and Android development.

## Projects

- **Seventy Times App (2025)** — *Jetpack Compose, MVVM, Hilt, WorkManager, DataStore, Room, Modularization*. Islamic Azkar and prayer reminder app (Qibla direction, Hijri date, daily push notifications) with **10,000+ users** on Google Play; modular, offline-first architecture. [Google Play] [GitHub]
- **FinWallet App (2025)** — *Jetpack Compose, MVVM, Hilt, Encrypted DataStore, Biometric Auth*. Secure fintech wallet with token-based authentication, encrypted local storage, and biometric login (fingerprint & face). [Repo — Private]
- **Movies App (2024)** — *Jetpack Compose, Hilt, Retrofit, Room*. Movie browsing app with offline caching, search, and third-party REST API integration. [GitHub]
- **Video Calling App (2024)** — *Stream SDK, ZEGOCLOUD*. Real-time video calling application with authentication and room management. [GitHub]
- **Mind Crafted App (2024)** — *Jetpack Compose, MVVM, Room*. Task and time management application with a study-timer feature. [GitHub]
- **Book Haven (2023)** — *XML, Firebase, MVVM*. PDF reading app with bookmarks, notes, offline support, and Firebase data synchronization. [GitHub]
- **The Office App (2022)** — *XML, Room, MVVM*. Case management system (add, edit, search, filter) with Room persistence and clean MVVM architecture. [GitHub]

## Education

**Assiut University** — B.S. in Computer Science Sep 2020 – Jun 2024  
Assiut, Egypt

## Technical Skills

**Programming Languages:** Kotlin, Java, Dart, Python, C++, C, Go

**Android & Cross-Platform:** Android SDK, Android Studio, Jetpack Compose, XML, Flutter, ViewModel, LiveData, Coroutines, Flow, Navigation Component

**Architecture & Practices:** MVVM, MVI, MVP, Clean Architecture, Modularization, Agile/Scrum, Code Reviews

**Data, Networking & Security:** Room, SQLite, DataStore (Encrypted), Firebase, Offline Storage, Retrofit, OkHttp, REST APIs, JSON, Android Keystore, Biometric Auth (Fingerprint & Face), Secure Mobile Development

**Background & Tools:** WorkManager, Push Notifications (FCM), Dagger-Hilt, Git, GitHub, CI/CD, JUnit, Play Console
